

I am writing to you to voice my opinion regarding regulation of satellite radio programming restrictions. The information that I receive through XM radio is unique in content and delivery. I believe that the information should not be restricted through federal regulation. I do not believe the National Association of Broadcasters should be allowed to control what information is provided to me through satellite broadcasting. I ask that you reject NAB's petition 04-160 so that my rights to seek out unique sources of broadcast information be held intact.
